

Aristocratic & Business CLUB Sub-Club Concept Car & Bike Club

The CLUB House and the Villas have all the needed infrastructure and specialists for health, wellness, beauty, and fitness. However, if it comes to fun this is achieved through our three Sub-Clubs which are free of charge for our members.

Car & Bike Club

Our Car & Bike Club with luxury SUVs, limousines, cabriolets, sport cars, off-roaders, side by sides, quads and motorbikes offers all what you need to be happy on wheels.

The outstanding characteristic feature of this Sub-Club is an homage to the last decade of the 12-cylinder engine and the most sophisticated battery driven vehicles. We have at least one car representing the greatest V12/W12 manufacturers of that time with Aston Martin, Bentley, BMW, Ferrari, Mercedes and Rolls Royce. Besides their unmatched running smoothness, they all have a unique sound and between 500 and 1000 hp. Most cars are full of luxury, security, and performance equipment.

If it comes to the car models, we focused on the possibility that you can take members of your family or friends with you. All on-and off-road cars have at least four seats and a useful trunk, the rest has two seats. Furthermore, we have some luxury limousines for special moments: A wonderful Rolls Royce, Mercedes-Maybach or BMW for a spectacular trip or a marriage in your family; two luxury cabriolets from Bentley and Mercedes-AMG for sunny power rides with wind in your hair enjoying the exquisite Tivat region; sport cars from Ferrari, Aston Martin, Bentley and Mercedes-AMG for thrilling rides on the coast and mountain roads. For 4x4 off-road adventures you can take a Jeep Rubicon cabriolet, a Land Rover Defender 110, a Ford Bronco, quads or side by sides. They are all fit for extreme terrain and endless fun. With their heavy-duty tires, reduction gear boxes and diff-locks you will manage all hurdles.

Additionally, the CLUB also has luxury vans from Mercedes that can take seven people and a lot of luggage and sport equipment.

Our motorbikes from BMW are all fully equipped with the latest technologies and cover a wide range of possible uses. For sport touring the S 1000 XR (226 kg/179 hp) for a grand tour the K 1600 GT with its six cylinders and for enduro cross country feeling or wherever you want to go the R 1250 GS Adventure with an unique two cylinder boxer. All bikes have adjustable multi-ABS, traction control, adjustable suspension systems at your fingertips. Furthermore, there are different Motocross and e-motorbikes available.
